Under its prior authorization program, Desjardins Insurance authorizes the reimbursement of certain drugs that meet criteria that are based, in particular, on clinical practice guidelines and recommendations issued by health technology assessment organizations. The drug will be eligible for reimbursement if it meets the insurer's criteria, if it's not administered in a hospital and if it's not eligible under a government program. If the information on your form is complete, your request will normally be processed within 5 business days.

When the request is received, it will be assessed in the strictest confidence. In some situations, additional diagnostic or clinical information may be required.

If the treatment continues beyond the authorized period, you will be asked to submit a new request form and provide information that justifies the extension of treatment. If you have a payment card, your pharmacist will be advised that the authorization period is coming to an end. The insurance must be in force and the patient still covered on the date expenses are incurred. This prior authorization is subject to change if, at the time expenses are incurred, the contract has been modified.

When Desjardins Insurance declines a prior authorization request, it is because we need to uphold conditions set out in the contract. It does not mean we are questioning the physician's opinion. If you have any questions, please contact our Client Relations Centre at the number indicated on page 1 of this form.
