

Fixed Income Investor Presentation

Q2 2025 Results

*All figures are in Canadian dollars and as at June 30, 2025,
unless otherwise specified.*

Caution Concerning Forward Looking Statements

This presentation contains forward-looking statements regarding, among other things, Desjardins Group's objectives regarding financial performance, priorities, vision, operations, targets and commitments and maturity profile. These statements include, but are not limited to, observations regarding its strategies to achieve them, its results and its financial position, as well as on economic conditions and financial markets. Such statements are typically identified by words or phrases such as "target," "objective," "timing," "outlook," "believe," "predict," "foresee," "expect," "intend," "have as a goal," "estimate," "plan," "forecast," "anticipate," "aim," "propose," "should" and "may," words and expressions of similar import, and future and conditional verbs, in all grammatical variants.

By their very nature, such statements require us to make assumptions, and are subject to uncertainties and inherent risks, both general and specific. Desjardins Group cautions readers against placing undue reliance on forward-looking statements when making decisions since a number of factors, many of which are beyond Desjardins Group's control and the effects of which can be difficult to predict, could influence, individually or collectively, the accuracy of the assumptions, predictions, forecasts or other forward-looking statements, including those in this presentation. It is also possible that these assumptions, predictions, forecasts or other forward-looking statements, as well as Desjardins Group's objectives and priorities, may not materialize or may prove to be inaccurate, and that future actual results, conditions, actions or events differ materially from targets, expectations, estimates or intentions that are explicitly or implicitly put forward. Readers who rely on these forward-looking statements must carefully consider these risk factors and other uncertainties and potential events, including the uncertainty inherent in forward-looking statements.

The factors that may affect the accuracy of the forward-looking statements in this presentation include those discussed in the "Risk management" sections of Desjardins Group's most recently published annual and any subsequent quarterly MD&As, and, in particular, credit, market, liquidity, operational, insurance, strategic and reputation risk, as well as environmental, social and governance risk, and regulatory risk. Such factors also include those related to security breaches (including cybersecurity), fraud risk, the housing market and household and corporate indebtedness, technological advancement and regulatory developments, including changes to liquidity and capital adequacy guidelines, and requirements relating to their presentation and interpretation, interest rate fluctuations, inflation, climate change, geopolitical uncertainty, artificial intelligence and data risk. In addition, there are factors related to the trade dispute with the United States and the impact that tariffs on certain Canadian exports as well as any resulting retaliatory tariffs could notably have on goods and services, businesses in certain industries, and the Canadian economy. Also of note are factors related to general economic and business conditions in regions in which Desjardins Group operates; monetary policies; the critical accounting estimates and accounting standards applied by Desjardins Group; new products and services to maintain or increase Desjardins Group's market share; geographic concentration; changes in credit ratings assigned to Desjardins Group reliance on third parties; the ability to recruit and retain talent and tax risk. Other factors include unexpected changes in consumer spending and saving habits, the potential impact of international conflicts on operations, public health crises, such as pandemics and epidemics, or any other similar event affecting the local, national or global economy, as well as Desjardins Group's ability to anticipate and properly manage the risks associated with these factors despite a disciplined risk management environment.

It is important to note that the above list of factors that could influence future results is not exhaustive. Other factors could have an effect on Desjardins Group's results. Additional information about these and other factors is found in the "Risk management" sections of Desjardins Group's last annual and quarterly MD&A and can be updated in subsequent quarterly MD&As.

The significant economic assumptions underlying the forward-looking statements in this document are described under "Economic environment and outlook" of Desjardins Group's 2024 annual MD&A and of the MD&A for the second quarter of 2025 and can be updated in subsequent quarterly MD&As. Readers are cautioned to consider the foregoing factors when reading this section. To determine the economic growth forecasts, in general, and for the financial services sector, in particular, Desjardins Group mainly uses historical economic data provided by recognized and reliable organizations, empirical and theoretical relationships between economic and financial variables, expert judgment and identified upside and downside risks for the domestic and global economies. In light of the changing circumstances of the U.S. trade dispute and the resulting impact on the Canadian economy, financial market conditions, commercial operations, and Desjardins Group's financial results and financial position, there is greater uncertainty about our economic assumptions than in previous periods, as these assumptions are based on uncertain future developments and it is difficult to predict how significant the long-term impact of U.S. tariffs will be.

Any forward-looking statements contained in this presentation represent the views of management only as at the date hereof, and are presented for the purpose of assisting readers in understanding and interpreting Desjardins Group's financial position as at the dates indicated or its results for the periods then ended, as well as its strategic priorities and objectives as considered as at the date hereof. These forward-looking statements may not be appropriate for other purposes. Desjardins Group does not undertake to update any oral or written forward-looking statements that could be made from time to time by or on behalf of Desjardins Group, except as required under applicable securities legislation.

This document does not constitute an offer to sell or solicitation of an offer to buy securities, nor will there be any sale of securities in any jurisdiction in which such offer, solicitation or sale would be unlawful.

Non-GAAP and other financial measures

To measure its performance, Desjardins Group uses different GAAP (IFRS) financial measures and various other financial measures, some of which are non-GAAP financial measures. Regulation 52-112 respecting Non-GAAP and Other Financial Measures Disclosure (Regulation 52-112) provides guidance to issuers disclosing specified financial measures, including those used by Desjardins Group below:

- Non-GAAP financial measures.
- Non-GAAP ratios.
- Supplementary financial measures.

Non-GAAP financial measures and ratios

Non-GAAP financial measures and ratios used by Desjardins Group, and which do not have a standardized definition, are not directly comparable to similar measures used by other companies, and may not be directly comparable to any GAAP measures. Regulation 52-112 states, among other things, that any ratio with at least one non-GAAP financial measure meets the definition of a non-GAAP ratio. These non-GAAP financial measures and ratios may be useful to investors, among others, in analyzing Desjardins Group's overall performance or financial position.

Net interest margin – Personal and Business Services

The Personal and Business Services segment's net interest margin, which is a non-GAAP ratio, is used to measure the profitability of core interest-bearing assets, net of financing cost. It is equal to net interest income on core assets expressed as a percentage of average core interest-bearing assets.

Average core interest-bearing assets is a non-GAAP financial measure that reflects the Personal and Business Services segment's financial position and is used to exclude assets not generating net interest income and certain other assets from average assets, when calculating net interest margin. The Personal and Business Services segment's average core interest-bearing assets include securities, cash and deposits with financial institutions, as well as loans, and excludes assets related to trading activities as well as assets related to capital market and liquidity management activities, and all other assets not generating net interest income.

Net interest income on core assets is a non-GAAP financial measure that is used to exclude net interest income generated by non-core assets from net interest income.

Loss ratio – Expense ratio – Ratio of losses on onerous contracts – Combined ratios

The following non-GAAP ratios, which are net of reinsurance, are used to analyze the performance of the Property and Casualty Insurance segment and more specifically:

- Loss ratio (undiscounted): Used as a measure of business quality.
- Expense ratio: Used as a measure of the effectiveness of non-interest expense management, excluding certain items such as non-interest expense related to claims.
- Ratio of losses on onerous contracts: Used as a measure of the effect of onerous contracts on profitability.
- Combined ratio (discounted and undiscounted): Used as a measure of business profitability, excluding the effect of the net insurance finance result and certain other income.

The loss ratio is equal to the net claims expenses expressed as a percentage of net insurance revenue. Net claims expenses is a non-GAAP financial measure, which is used to exclude policy costs and acquisition costs, as well as the effect of the loss component on onerous contracts and the effect of discounting net liabilities for incurred claims, and to take into account incurred claims and costs of ceded claims.

Non-GAAP and other financial measures

Net insurance revenue is a non-GAAP financial measure. It is used to exclude premiums paid related to reinsurance activities and is the denominator in calculating the following ratios: loss ratio, expense ratio and ratio of losses on onerous contracts.

The loss ratio is comprised of the following ratios:

- Current year loss ratio, which is the loss ratio excluding catastrophe and major event claims expenses for the current year as well as claims expenses for changes in prior year claims, net of related reinsurance held.
- Loss ratio related to catastrophes and major events, which is the loss ratio including catastrophe and major event claims expenses for the current year, net of related reinsurance held.
- Ratio of changes in prior year claims, which is the loss ratio including changes in prior year claims, net of related reinsurance held.

The expense ratio is equal to non-interest expense, excluding non-interest expense related to claims and certain items, expressed as a percentage of net insurance revenue. Non-interest expense excluding non-interest expense related to claims and certain items is a non-GAAP financial measure. It is used to consider all expenses excluding investment management fees and some other specific items.

The ratio of losses on onerous contracts is equal to the effect of the loss component on net onerous contracts expressed as a percentage of net insurance revenue. The effect of the loss component on net onerous contracts is a non-GAAP financial measure, which is used to include losses and reversals of losses on net onerous contracts, as well as decreases in the loss component related to past services, net of reinsurance.

The combined ratio is equal to the sum of the loss ratio, the expense ratio and the ratio of losses on onerous contracts.

The discounted combined ratio is equal to the combined ratio, including the effect of discounting net liabilities for incurred claims.

Return to members and the community

As a cooperative financial group contributing to the development of communities, Desjardins Group gives its members and clients the support they need to be financially empowered. The amount returned to members and the community, a non-GAAP financial measure, is used to present the overall amount returned to the community and is composed of member dividends, as well as sponsorships, donations and scholarships.

Supplementary financial measures

In accordance with Regulation 52-112, supplementary financial measures are used to show historical or expected future financial performance, financial position or cash flows. In addition, these measures are not disclosed in the financial statements.

Additional information on specified financial measures is incorporated by reference. It can be found in the “Non-GAAP and other financial measures” section of the MD&A for Desjardins Group’s second quarter of 2025. The MD&A is available on the SEDAR+ website at www.sedarplus.com (under the *Fédération des caisses Desjardins du Québec* profile).

Sustainability target

As at December 31, 2024

We want to assert our role as a socio-economic leader by participating in the sustainable development of the communities in which we operate, and by accompanying our members and customers in the transition to a more low-carbon, equitable and inclusive economy.

A low-carbon economy

- Climate ambition: **net zero emissions by 2040** in our operations and financial activities (financing and insurance investments) in three high-emitting sectors: energy, real estate, transportation
- Financing and investment targets for renewable energy in the energy sector
- More than **2/3 of the energy financing portfolio** is allocated to **renewable energy**

A fair and inclusive company

- EDI targets for youth, women, Aboriginals and visible minorities
- **Supplier diversity** program
- **Women's Governance** – Platinum Parity Certification
- For the 18th consecutive year in 2025, in Corporate Knights' ranking of **Canada's Best 50 Corporate Citizens**

Sustainable community development

- **\$557 million** given back to members and communities
- Support for the construction of **1,750 affordable housing units** by the end of 2025
- **541,336 young people supported** by the Desjardins Foundation

ESG Highlights

As at December 31, 2024

Desjardins has achieved, in September 2024, its target of establishing a \$2.1 billion investment portfolio dedicated to renewable energy infrastructure by the end of 2025.

Launch of a carpooling platform, accessible to all employees of the Movement. This application allows employees to plan and make trips together to their workplace.

In 2024, Desjardins carried out its third issuance of sustainable bonds, this time on the European market, for an amount of 500 million EUR (approximately 749 million Canadian dollars). This issuance will finance climate and environmental projects that highlight, among other things, renewable energy, green buildings, and clean transportation.

Desjardins has deployed an internal program to optimize and monitor the energy consumption of the buildings it occupies. Since 2018, the approximately 210 energy audits carried out have identified energy optimization and decarbonization measures.

Internal implementation of the Desjardins ESG program, with the objective of strengthening the robustness of ESG data, complying with new regulatory disclosure requirements, and better monitoring risks to enable better strategic decision-making.

Desjardins signed the Investor Statement on Vaping, initiated by the Tobacco-Free Finance Pledge, and aligned with our position on tobacco and vaping adopted in 2020. This statement calls on governments to act on regulation and awareness to reduce the growing risks associated with vaping, particularly for young people.
